Make an investment in K-12 physics and chemistry education and DOUBLE the impact

Master of Natural Science (MNS) degree and the Modeling Instruction Program are two innovative and successful approaches to teacher development at Arizona State University. Our mission is to expand the number of physics and chemistry teachers who participate in this important learning experience, ensuring that Arizona offers exemplary science education to be competitive in leading-edge industries.

Gifts matched by the college and generous corporate support have funded 185 teacher scholarships since 2011, helping to encourage world-class scientific and mathematical literacy.
